TIFAS® LockBolt standard system	Overview		4
	Brazier	Steel, tempered (Type 5) galvanised, passivated	6
	Brazier	Steel, tempered (Type 8) galvanised, passivated	7
	Brazier	Stainless steel	8
	Brazier	Aluminium	10
	Countersunk 90°	Steel, tempered (Type 5) galvanised, passivated	12
	Countersunk 90°	Steel, tempered (Type 8) galvanised, passivated	13
	Countersunk	Aluminium	14
	Standard collar	Steel, galvanised, passivated	15
	Standard collar	Stainless steel	16
	Standard collar	Aluminium	17
	Flanged collar	Steel, galvanised, passivated	18
	Flanged collar	Stainless steel	19
	Flanged collar	Aluminium	20
	Low-profile collar	Steel, galvanised, passivated	21

# TIFAS® LockBolt standard system

Lockbolts are ideal for permanently and securely fastening two parts together so that they will never detach, even when subjected to preload or dynamic load.

TIFAS® LockBolt is the standard system offered by Titgemeyer GmbH & Co. KG and comprises a pin as well as three versions of collar: standard, low-profile or flanged. The components marry perfectly with each other to ensure correct assembly and a reliable fixing. Even when subjected to vibrations, the applied clamp force remains constant. As a positive locking device that fastens permanently with the bolt, the collar is impossible

to remove. The expertise that we have acquired through manufacturing these components in-house means we can also offer bespoke solutions for customers, subject to feasibility.

## Benefits at a glance

- High clamp force
- Installation process guarantees safe build-up of clamp force
- Constant clamp force / preload
- Vibration resistant
- No heat exposure around the joint
- No warping
- No refinishing required around the joint
- No surface damage on components
- Visual inspection
- Installation can be checked using process monitoring
- Maintenance-free
- Quick and easy installation
- Bespoke customer solutions available on request

## DeltaBolt® standard lockbolt system

- 1 = Brazier or countersunk head  
 2 = Smooth pin shank  
 (minimum grip range)  
 3 = Locking grooves into which  
 the collar is swaged  
 4 = Breakneck groove  
 5 = Pin tail (for installation tool)  
 6 = Collar with cone-shaped tip

## Installation steps

1. Select lockbolts based on the specified requirements as well as the clamping thicknesses available on-site (sum total of all wall thicknesses to be installed)
2. Select the installation tool, incl. pulling head that matches the lockbolts to be installed (for details, see "Overview - Lockbolts" in the "Tools for Lockbolts" catalogue)
3. Insert the bolt into both through-holes on the component and, with the chamfer aligned to the end of the bolt, slide the collar over the pin. (Fig. 1)
4. Fully press the installation tool with attached pulling head against the collar while securing the pin in place from the opposite side to prevent it from being poked out. (Fig. 2)
5. Press the trigger on the tool. The jaws then grip into the grooves on the pin tail and tug at the pin. The pulling head sleeve presses up against the components and the resulting clamp force pushes them together. (Fig. 3)
6. As the tool continues to pull, the pulling head sleeve slides over the collar. (Fig. 4) This reduces the external diameter of the collar. The compressed material slides into the locking grooves of the bolt to form the desired positive fit. As the front side of the sleeve elongates, it is pushed up against the component to create the desired preload where the parts connect.
7. The tool will continue to pull until the lockbolt's breakload is achieved causing the tip of the bolt (pulling head) to snap off at the breakneck groove. Installation is now complete. (Fig. 5)

\* Tolerance:  $\varnothing$  4.8: -1.0 mm;  $\varnothing$  6.4: -1.0 mm,  $\varnothing$  8.0: -1.1 mm,  $\varnothing$  9.6: -1.2 mm

The tensile strength and clamp shown may be lower in practice and are for guidance purposes only. Lockbolts with a surface coating (zinc, clear passivate) have approx. 15% less tensile strength than shown. For more detailed information, please contact your representative at our company.

# TIFAS® LockBolt

## Standard collar

### Material

Stahl EN 10263-2 galvanised, passivated

For nominal bolt $\varnothing$	A min [mm]	B max [mm]	Article No.
4.8	7.7	7.2	376 305 001
6.4	10.1	8.2	376 307 001
8.0	12.3	9.5	376 308 001
9.5	14.9	11.9	376 310 001

Other designs available on request.

### Please note:

Low-profile collar = larger grip range

Standard collar = see tables for grip range

Flanged collar = smaller grip range

# TIFAS® LockBolt

## Standard collar

### Material

Stainless steel 1.4567 EN 10263-5

For nominal bolt $\varnothing$	A min [mm]	B max [mm]	Article No.
4.8	7.7	6.2	376 370 001
6.4	10.1	8.2	376 371 001
8.0	12.3	9.5	376 372 001
9.6	14.9	11.9	376 373 001

Other designs available on request.

### Please note:

Low-profile collar = larger grip range

Standard collar = see tables for grip range

Flanged collar = smaller grip range

# TIFAS® LockBolt

## Standard collar

### Material

Aluminium EN AW 6061

For nominal bolt ø	A min	B max	Article No.
[mm]	[mm]	[mm]	
4.8	7.7	6.2	376 395 001
6.4	10.1	8.2	376 397 001
8.0	12.3	9.5	376 398 001
9.6	14.9	11.9	376 399 001

Other designs available on request.

### Please note:

Low-profile collar = larger grip range

Standard collar = see tables for grip range

Flanged collar = smaller grip range

# TIFAS® LockBolt

## Flanged collar

### Material

Stahl EN 10263-2 galvanised, passivated

For nominal bolt ø	A min	B max	C max	D*	Article No.
[mm]	[mm]	[mm]	[mm]	[mm]	
4.8	7.7	7.0	10.0	1.6	376 325 001
6.4	10.1	9.5	13.2	2.0	376 327 001
8.0	12.3	10.6	16.4	2.4	376 328 001
9.6	14.9	13.3	19.7	3.2	376 330 001

\* If using flanged collars, the grip range will be that of a standard collar minus dimension D.

Other designs available on request.

### Please note:

Flanged collar = grip range reduces by dimension D

Standard collar = see tables for grip range

# TIFAS® LockBolt

## Flanged collar

### Material

Stainless steel 1.4567 EN 10263-5

For nominal bolt ø	A min	B max	C max	D*	Article No.
[mm]	[mm]	[mm]	[mm]	[mm]	
4.8	7.7	7.0	10.0	1.6	376 386 001
6.4	10.1	9.5	13.2	2.0	376 387 001
8.0	12.3	10.6	16.4	2.4	376 388 001
9.6	14.9	13.3	19.7	3.2	376 389 001

\* If using flanged collars, the grip range will be that of a standard collar minus dimension D.

Other designs available on request.

### Please note:

Flanged collar = grip range reduces by dimension D

Standard collar = see tables for grip range

# TIFAS® LockBolt

## Flanged collar

### Material

Aluminium EN AW 6061

For nominal bolt ø	A min	B max	C max	D*	Article No.
[mm]	[mm]	[mm]	[mm]	[mm]	
4.8	7.7	7.0	10.0	1.6	376 355 001
6.4	10.1	9.5	13.2	2.0	376 390 001
8.0	12.3	10.6	16.4	2.4	376 391 001
9.6	14.9	13.3	19.7	3.2	376 360 001

\* If using flanged collars, the grip range will be that of a standard collar minus dimension D.  
Other designs available on request.

### Please note:

Flanged collar = grip range reduces by dimension D

Standard collar = see tables for grip range

# TIFAS® LockBolt

## Low-profile collar

### Material

Steel EN 10263-2 galvanised, passivated

For nominal bolt ø	A min	B max	C*	Article No.
[mm]	[mm]	[mm]	[mm]	
4.8	7.7	4.3	2.4	376 315 001
6.4	10.1	5.5	3.2	376 323 001
8.0	12.3	6.5	3.2	376 318 001
9.6	14.9	8.5	4.0	376 320 001

\* If using low-profile collars, the grip range will be that of a standard collar plus dimension C.

Other designs available on request.

### Please note:

Low-profile collar = grip range increases by dimension C

Standard collar = see tables for grip range
